ANNEXURE.

Review on the Cattle Mortality in the State for the half-year ending 31st December 1927.

The Cattle Mortality for the half-year ending 31st December 1927, from contagious diseases was considerably less than for the same period in the previous year, being 10,543 against 17,404. On the other hand the mortality from non-contagious diseases was considerably higher, 30,166 being recorded against 24,446 of the previous year, the reason for this being that a larger number of deaths occurred from natural decay and accidents and other causes.

The submission of cattle mortality returns by patels continues to be very unsatisfactory in several taluks, especially in the Bangalore, Devanhalli, Magadi, Mysore, Nanjangud, Seringapatam, Hunsur, Heggaddevankote, T.-Narsipur, Shimoga, Shikarpur, Arkalgud, Belur, Chitaldrug and Hosdurga Taluks, and there has been a falling off in the number of C. M. returns received from patels in the Taluks of Challakere, Harihar, Jagalur, Channarayapatna, Hole-Narsipur, Manjarabad, Dodballapur, Nelmangala, Chamrajnagar, Gundlupet, Krishnarajpete, Pavagada, Kortagere, Tiptur, Goribidnur and Mudgere. It has also been observed that instructions issued in Government Order No. I. C. 7029-38—A. & E. 160-23-2, dated 12th May 1924, have not been carried out in a few taluks, notwithstanding the attention of the Amildars having been drawn to them. In other taluks, the C. M. return forms have not been distributed to all patels.

Return of Cattle Mortality in the Mysore State for the half-year ending 31st December 1927—*contd.*
